Submitted by The Provincial Court of Alberta

Alberta Health Services has recommended that measures be taken to reduce the amount of time individuals spend in large

crowds or in crowded spaces to help reduce the transmission of COVID-19 in the community.

To protect the health and safety of all court users while ensuring respect for the legal rights of accused

persons and civil litigants, the Provincial Court of Alberta is limiting all regular operations, effective Tuesday, March 17, 2020, until further notice.

Submitted by City of Leduc

The City of Leduc declared a state of local emergency at 6:51 p.m. on Monday, March 16, in order to further support provincial efforts to contain the spread of the COVID-19 virus. By declaring the state of local emergency, the city will be empowered to access resources needed to address a potential outbreak with-

in the community, as well as to enforce additional restrictions and closures as required to contain the spread.

“Leduc City Council and administration have been closely following the development of the COVID-19 pandemic, and we are taking very deliberate and careful measures in order to protect our residents, staff and visitors,” says Leduc Mayor Bob Young.

“The ongoing health of our community members is our top priority, and we fully support this declaration as we are confident it is the appropriate next step in order to effectively manage this public health event.”

Following Alberta Health Services’ recommendations, the City of Leduc is also taking the following measures:

JOKE OF THE WEEK

A parishioner was in front of me coming out of church one day, and the preacher was standing at the door as he always is to shake hands. He grabbed the parishioner by the hand and pulled him aside. The Pastor said to him, "You need to join the Army of the Lord!"

The parishioner replied, "I'm already in the Army of the Lord, Pastor." Pastor questioned, "How come I don't see you except at Christmas and Easter?" He whispered back, "I'm in the secret service."

LEDUC COUNTY CANCELS ALL PUBLIC PROGRAMS AND EVENTS IN RESPONSE TO COVID-19

Submitted by Leduc County

This afternoon, Leduc County announced that all county-hosted public programs and events, including council and committee meetings, will be cancelled until further notice in response to the COVID-19 pandemic.

In addition, public access to all Leduc County administrative buildings has been re-

stricted for the safety of both staff and residents.

"These decisions are in line with health authorities' recommendations to practice social distancing and avoid time spent in crowded spaces," says Leduc County Mayor Tanni Dobranko. "The health and safety of our residents and our employees is our priority. We recognize that the situation is changing on a daily basis, which is challenging for all of

us; but we are in this together and are doing our best to keep everyone safe during this unprecedented time."

At this time, Leduc County's operations and emergency services' response levels remain intact.

On March 11, the county activated its Emergency Co-ordination Centre (ECC) to coordinate resources and information, and ensure that essential services continue to

operate.

ECC staff are consistently reviewing the information being released by Alberta Health Services and the federal and provincial governments to inform decision making and actions related to the effects of the situation on Leduc County.

Operational updates from Leduc County are available online at www.leduc-county.com/COVID-19.

WHAT TO KNOW ABOUT DIY INSULATION

Perhaps due in part to the popularity of home improvement television shows, many homeowners now tackle an assortment of home projects without professional assistance. These weekend warriors embrace the do-it-yourself philosophy to home improvement, saving lots of money along the way.

As rewarding as successful DIY projects can be, it's important that homeowners avoid getting in over their heads. Some projects, such as those that involve plumbing or roofing, tend to be best left to the professionals. But many other projects, including insulation installation, are very DIY-friendly.

Can I install insulation myself?

The Insulation Institute notes that DIY insulation installation is definitely doable, though typically only when homeowners are installing certain types of insulation. The Institute notes

that installing fiberglass or mineral wool insulation can be simple. However, homeowners who prefer spray foam insulation should leave installation to the professionals.

What should I do before beginning the project?

The Insulation Institute advises homeowners who are going to install insulation to determine if vapor retarders, sometimes referred to as "vapor barriers," will need to be installed before they begin the project. Vapor diffusion retarders can reduce the amount of moisture transferred by air currents, but they are not always necessary. Factors such as climate, cladding type (i.e., brick, stucco, wood, etc.) and the location of the wall being insulated will help homeowners determine if they need vapor diffusion retarders. Homes located in places with mixed climates often

need vapor diffusion retarders. DIYers can visit www.insulationinstitute.org to learn more or consult with an insulation or watersealing professional to determine if they need vapor diffusion retarders.

Determining R-value is another important pre-project step. Different climates require different insulation R-values, which the U.S. Department of Energy notes is a measurement of an insulating material's resistance to conductive heat flow. The higher the R-value, the greater the insulation effectiveness. The amount of R-value your insulation needs will depend on the climate, the existing heating and cooling system in the house and which part of the house you will be insulating. More information about R-value is available at energy.gov/energysaver/weatherize/insulation.

DIYers also will need the appropriate tools and attire before beginning an insulation installation project. In addition to the insulation itself, the online resource The Home Improvement Web® recommends the following tools:

- Safety glasses
- Dust mask or respirator
- Stapler (electric, standard, or hammer type)
- 3/8" or 1/2" staples
- Protective clothing
- Work light
- Tape measure
- Extension cord
- Utility knife and extra blades
- Stepladder(s)
- Straightedge for cutting insulation

DIYers can access any number of insulation installation tutorials online to determine if they can install insulation without hiring professionals.

DECOR IDEAS FOR A FRESH LOOK THIS SPRING

Spring is a season of rejuvenation, and that spirit of renewal can take hold inside a home.

Warm weather and longer hours of daylight make spring a perfect time to imagine a home's interior design in a new light. The following are a handful of decor ideas that may inspire homeowners to give their homes an entirely new look this spring.

• Wallpaper: Wallpaper fell out of favor years ago, but new styles that aren't so heavily patterned can make for wonderful additions to any room. Large-scale prints can give a room a whole new feel without giving homeowners or their guests the impression that they have stepped back in time. A simple, mural-style floral wallpaper on the walls surrounding a table in a breakfast nook can bring nature inside.

• Pastel colors: Nothing em-

bodies the spring quite like pastel colors. If colorful, bright flowers dot the garden in the backyard, homeowners can bring those uplifting pastels inside by painting an accent wall or even adding some brightly colored accent furniture to rooms that could use a lift.

• Declutter: Clutter is often conquered during spring cleaning sessions, but homeowners who want to create more free-flowing interior spaces can downsize their furniture and/or look for multipurpose features that make it hard for clutter to take over a room. Create more open space in entertaining areas by mounting the television and getting rid of a bulky entertainment center. Create even more space by replacing rarely used end tables with a storage ottoman where books and magazines can be stored to give a room a fresh, clean look.

• Accent features: Sometimes the smallest changes to an interior space make the biggest impression. Replace dated accents like vases and table lamps with newer items that reflect the latest styles and trends. Such adjustments won't break

the bank, and they can give rooms a whole new feel.

Spring is a great time to reconsider home interiors. This spring homeowners can embrace various strategies, both big and small, to give their homes a whole new feel.

A MESSAGE FROM MLA MARK SMITH

Submitted by MLA Mark Smith | Drayton Valley – Devon Constituency

It was another busy week for MLAs here in Edmonton, and I am pleased to share the initiatives that our government is working towards to help make life better for the people of Drayton Valley-Devon.

As announced in Budget 2020, our government is supporting \$19.3 billion worth of infrastructure projects that families and communities need in the next three years. This means that there are more funds available to build and maintain roads, hospitals, schools, and other projects that will help make life better for Albertans. These investments are also expected to create 3,000 well-paying jobs for Albertans by 2022. I am proud that our government is delivering on our promises, and taking real steps to get our province back to work.

StatsCan job numbers for February 2020 also showed an increase of 11,400 jobs in Alberta with an added increase of 19,200 in the private sector. While it was good to see the net creation of 11,000 jobs in Alberta in the month of February, we are not satisfied. There are still too many Albertans out of work and we will not celebrate until we see a significant turnaround in our economy. Month to month we will continue to see employment numbers go up and down but the key is to make sure the government is doing everything it can to create the right conditions for job creation.

A few invested constituents have brought forward concerns regarding recent government changes to Alberta's Park Systems. The streamlining of the Alberta Parks system will ensure that more funds flow to signature destinations in our province, this is not an outright privatization of government owned land and facilities as has been suggested. Budget 2020 announced that 164 under-used locations

- 0.3 percent of the land operated by Alberta Parks - will be returned to Crown Land designation. These sites will be open to new partnerships with non-profits, communities, or First Nations who can properly invest in their maintenance. The new budget also introduces some fee changes for campgrounds to reflect the costs of these services. By making common-sense changes, our government will be able to maintain the

high-quality destinations in this province.

Finally, I understand that many Albertans are concerned about the global spread of the novel coronavirus, or COVID-19. While the current overall risk to Albertans is low, it is important to be prepared with accurate information. The best way to protect yourself and your family from illness is by practicing good hygiene, including regular handwashing

and coughing or sneezing into your elbow or sleeve. Anyone who has health concerns or is experiencing symptoms of COVID-19 should directly contact Health Link 811 for assessment and to see if follow-up testing is required. For the latest updates and prevention information, please visit alberta.ca/coronavirus. Together, we can protect our communities and combat misinformation about the global coronavirus outbreak.

STOCK THE CAR FOR ROADSIDE EMERGENCIES

Disasters can happen in a flash, and having a plan in place for common emergency situations can make it easier to handle adverse conditions, particularly when away from home.

According to MFASCO Health and Safety, a supplier of first aid supplies and kits, 90 percent

of people do not carry first aid supplies or other emergency gear in their vehicles. Among those who may carry supplies, 30 percent never check to determine if they're in good working order. The National Safety Council says that drivers should always keep emergency supply

kits in the trunks or cargo areas of their vehicles. Kits should be inspected every six months, and worn out items should be replaced.

Roadside emergency kits can make the difference between getting back on the road safely or being stranded for hours. Such kits also may help prevent or treat injuries, potentially saving lives. Weather should be considered when preparing vehicle emergency kits, which should include the following.

- A properly inflated spare tire and tire-changing equipment
- Jumper cables
- A multipurpose utility tool and/or tool kit
- Flashlight and batteries
- Flares or triangle reflectors
- An extra quart of motor oil
- A first-aid kit containing at the least, gauze, tape, bandages, antibiotic ointment, aspirin, nonlatex gloves, scissors, hydrocortisone, thermometer, tweezers, and instant cold compress
- A blanket

- A tire pressure gauge
- A portable tire inflator
- Paper towels
- Nonperishable, high-energy foods

- Drinking water
- A reflective vest
- Duct tape
- A fire extinguisher
- An ice scraper
- A folding shovel
- Coolant and washer fluid
- A phone charger
- Baby/child supplies, if pertinent

Keep roadside emergency kits organized at all times. Store items securely in a milk crate, box or backpack so they are always readily available. People should familiarize themselves with the items in the kit so they know how to use them correctly and quickly.

With some planning and organization, drivers can have the supplies they will need to make it through roadside emergencies safely.
